### Changes to Servers

The new server model is now being tested. In order to carry out the test, all users have been redirected to CN01 server.

The format of the server number has been changed.

Original Format: CN01 (Country Code and Number)

New Format: CN-CAN-01 (Country Code - Airport Code - Number)

**Please Note:** The Airport Code **doesn't** mean my servers are near airports. (My servers are not near airports.) This only indicates my server locations in Cities.

### Old Server Model

Server	Location	IPv4 Address	IPv6 Address
CN01	China	8.212.14.141	240b:4001:21b:3c00::1603:7e
UK01	United Kingdom	78.141.194.139	2a05:f480:1000:508::1603:7e

### Old Server Model

#### Key:

Green: Files (e.g. photos, vlogs)

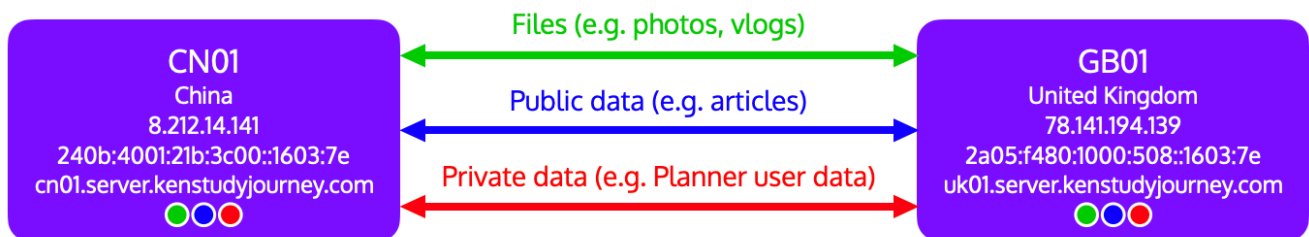

Blue: Public data (e.g. articles)

Red: Private data (e.g. Planner user data)

Full Arrow  $\longleftrightarrow$  : Always transfer

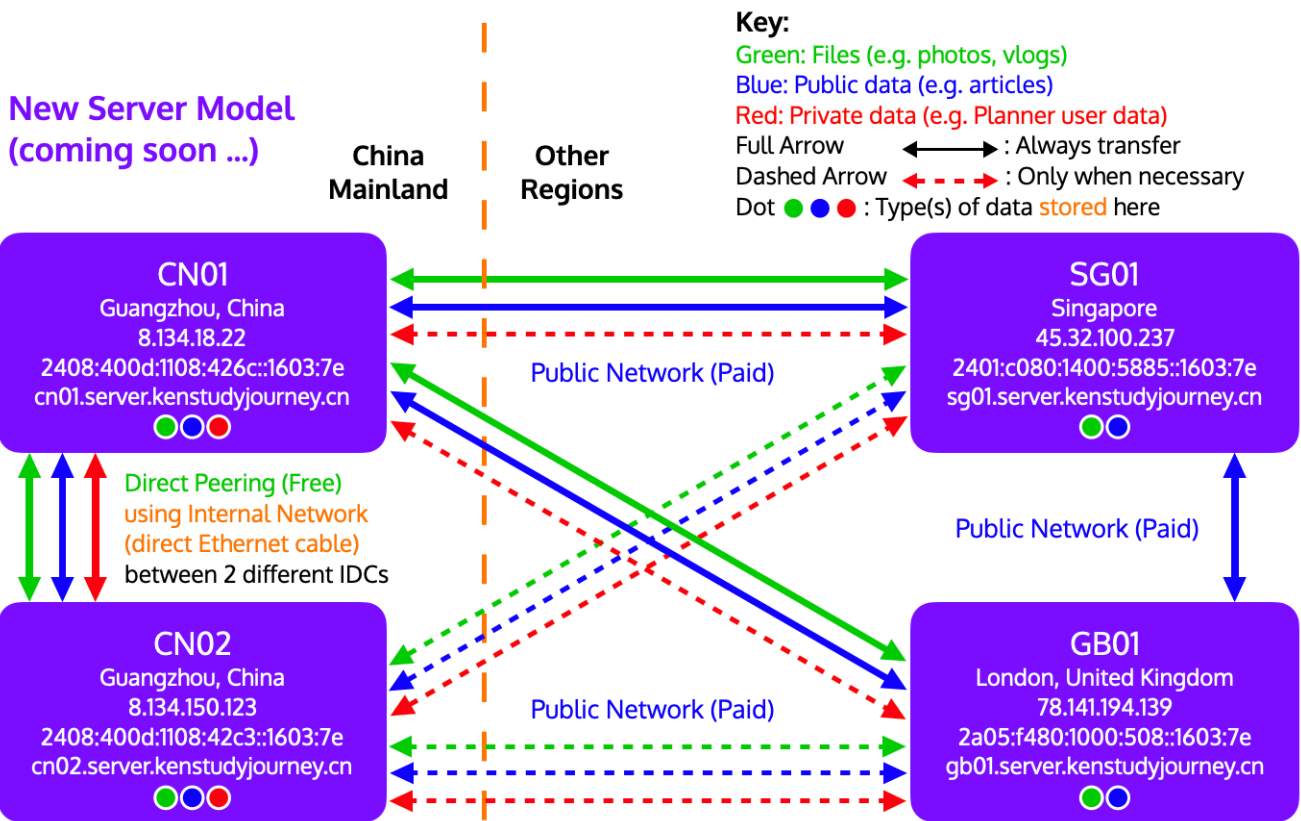

Dashed Arrow  $\dashrightarrow$  : Only when necessary

Dot ● ● ● : Type(s) of data stored here

### New Server Model

Server	Location	IPv4 Address	IPv6 Address
CN-CAN-01	Guangzhou, China	8.134.18.22	2408:400d:1108:426c::1603:7e
CN-CAN-02	Guangzhou, China	8.134.150.123	2408:400d:1108:42c3::1603:7e
SG-SIN-01	Singapore	45.32.100.237	2401:c080:1400:5885::1603:7e
GB-LHR-01	London, UK	78.141.194.139	2a05:f480:1000:508::1603:7e

After this data transfer, your data will be **immediately erased/removed from my old CN01 server**. The old CN01 server and its IP addresses will be released after several days.

My Routing Policy:

- China Mainland: CN-CAN-01 and CN-CAN-02
- Europe, North and South America, Africa: GB-LHR-01
- All Other Regions: SG-SIN-01

Using my services via proxy servers and relays is **not recommended** because:

- There will be an increased (international) Internet latency;
- Your data will have to be transferred to outside China Mainland, which may degrade your personal data security and protection.

As a Chinese international school (A Level) student, Ken's Study Journey strives to program, provide and share my top study tips and tools (e.g. Ken's Study Planner) in my free time to students worldwide.

Hope you can study effectively with my improved version of my services, getting more A\*s and other outstanding results in international exams. Come on!

## What is ICP Registration?

ICP is shorted by Internet Content Provider.

The registration rigorously verifies the identity of the website owner, using ID cards, passports and/or company licenses.

Only with Chinese ICP registration can the website use servers in China Mainland.

It is usually done by Chinese website owners, which can be Individual or Company/Enterprise. The person must be at least 18 years old to register.

This can be checked on the Ministry of Industry and Information Technology (MIIT) of China official website (<https://beian.miit.gov.cn>).

It is used for prevent prohibited content or other form of Internet abuse and identifying fake websites (if the original website has ICP registration).

After registration, there is a registration number (e.g. 粤ICP备xxxxxxx号 for Guangdong Province) shown on the website footer with a link to the checking website.

## How to Check my Website's ICP Registration?

You can follow these steps if you need to check whether a website is **fake and impersonating** Ken's Study Journey.

**Note: My old domain names may not include registration currently to avoid services interruption, which may be registered later on.**

You can also use this to check other ICP-registered Chinese websites.

1. Check and copy the ICP registration number at the bottom, or the website's domain name on the browser address bar (**Do Not include "www." prefix**, just copy "kenstudyjourney.cn").
2. Open the China MIIT Official Checking Website: <https://beian.miit.gov.cn>
3. Enter the registration number or domain name to check.  
- you may need to complete a slider CAPTCHA
4. Verify the information with my Chinese name (邓越) and/or the website Chinese name (Ken的学习之旅).

## Caution

(D)DoS and/or CC attack is **illegal** in some countries or regions, even if it is an illegal website.

If the attack(s) cause severe service interruptions, the attacker may be subject to legal responsibility and even constitute crimes.

The correct way to solve a problem is to use polite language to contact the platform, providing your suggestions (i.e. how to improve their services) in the first step.
